

Linda Hollingdale Photography Product & Price List

Linda's photographs are digital OR film negatives scanned to digital files. Prints are digital and printed on a Canon Pro9500 Mark II ink jet photo printer. Linda uses genuine Canon inks and high quality photo paper from Canon or Red River so, if displayed properly, prints have a minimum 70 year life expectancy. Linda also guarantees her photos and will replace any photo that is flawed in any manner (this applies only to the products Linda provides... not to SmugMug orders).

Here are the basic products and prices. Different sizes and custom orders can also be made by contacting Linda... (lindamary22@comcast.net)
